

# PEMF THERAPY

(PULSED ELECTROMAGNETIC FIELD THERAPY)

## How it Works

PEMF therapy sends magnetic energy into the body. These energy waves work with your body's natural magnetic field to improve healing. The human body requires electricity to sign signals throughout the body and to your brain. PEMF therapy effectively can realign the electricity in your cells to promote overall wellness.

## How Does it Feel?

Just like most therapies, everyone feels differently. Some people feel an increase in energy while most feel more relaxed muscles as well as an decrease in pain immediately. You may feel pulsing during treatment.

## Benefits

- Enhances body's natural recovery process
- Increases Natural Energy
- Improves Athletic Performance
- Reduces Inflammation and Pain
- Can Help With:
  - Chronic Inflammation
  - Chronic Fatigue
  - Peripheral Neuropathy
  - Osteopenia
  - Osteoperosis
  - Poor Wound Healing
  - And Much More...
